#### To Our Many Friends and Customers

With the advent of another planting season we take pleasure in presenting this instructive booklet which lists the hardy and tested varieties suitable for this district along with proper instructions for their successful cultivation.

VISITORS are always welcome to inspect our store and nursery. It is situated in a garden district where there is plenty of parking space for cars. Having a seed store and nursery combined, patrons will find it convenient to make their entire garden supply purchases at one time. Courteous and expert garden advisers are always on hand to help you. You will feel at home in our store. Highest quality merchandise along with fair prices and courteous treatment have made us the most popular garden supply house here.

Thank You—We take this means to thank the many patrons who favored us with their orders during the past season, and trust that everything we supplied came fully up to expectations.

Please Order Early—The best time is just as soon as this catalogue reaches you. The stock may not be ready by then, but your order will be given immediate attention, and be filled just as soon as the stock arrives. At the first of the season there are no sorts sold out, and, besides, you get first pick.

Terms—Cash must invariably accompany order. Our prices are very low—as low as consistent with honest treatment and first class stock allows—and we cannot under any circumstances open an account or do a credit business, regardless of how responsible a customer may be. Our liberal terms of prepayment and low prices will not admit of it. All items mentioned postpaid are delivered free within the fourth zone.

#### C. O. D. Orders—We do not send goods "COLLECT ON DELIVERY" outside of San Francisco.

Making Out An Order—Please write out all orders plainly. Positively be sure to sign your name to the order, and as surely give your postoffice address, county and state, also express office, if different from post office. Please keep a copy of your order, so as to check up stock on arrival. Make remittances by any of the following methods: Bank drafts, Postoffice or Express Money Order, or Personal Check. Make remittances payable to the Sunset Seed and Nursery Co.

Substitutions—As a rule we do not substitute unless given permission to do so; occasionally out of a large list of varieties called for, a variety may be sold out, and on so small an item it is generally better to make a good substitution than to send this small item short. When ordering late in the season it is always best to name a second choice—but it always is customer's privilege to order "no substitutions." We rarely have to substitute unless at the end of the season, but it is best to provide for the contingency. Our advice is to order early.

Safe Arrival Guaranteed—We guarantee all stock to reach customers in good condition. Any just complaint should be made at once upon receipt of shipment. We ship to nearly every state in the Union, and with our many years' experience in packing and shipping, we can safely agree to deliver stock to the most distant points in good condition. In case of unreasonable delay in arrival of stock, notify us, send copy of order, when originally mailed, how remitted and amount.

Non-Warranty—Most of the failures with seeds, plants and bulbs are due to causes entirely beyond our control, such as unfavorable weather, too deep and too shallow plantings, slugs, etc., therefore we give no warranty, express or implied, as to description, purity, productiveness, or any other matter of any seeds, plants, bulbs, etc., we send out, and will be in no way responsible for the crop; if the purchaser does not accept the goods on these terms, they are to be returned to us at once.

(NOTE.—All prices in this catalog are subject to change without notice.)  $\,$ 

### Sunset Seed and Nursery Company

1720 Ocean Ave. (Westwood Park)

San Francisco, California (Open Sunday Mornings 9 to 1)

#### WARNING TO CUSTOMERS

WE HAVE NO AGENTS here or elsewhere and caution our customers to be very careful of house to house peddlers and others representing themselves as our agents. We deliver all orders in S. F. the same day as received, by our own trucks.

#### FLOWERING BULB DEPARTMENT

#### Sunset Seed and Nursery Company's Highest Quality Imported Dutch Bulbs

#### Notice to Customers

We have plainly specified the months the different bulbs and plants are ready to be planted in this district. This we have done to aid you, as it is very important to plant at the proper time for best results.

#### How to Grow Our Bulbs Successfully Outdoors

Bulbs are offered during the Fall months and planting should be done early to insure the finest long stemmed sturdy flowers. However, very good results and successive blooms can be had by later planting.

Plant bulbs, as a rule, so that there is earth over them to

later planting.

Plant bulbs, as a rule, so that there is earth over them to their own depth. Small bulbs, such as Freesias, Crocus, Ranunculus, Spanish Iris, etc., should be set about 3 to 4 inches apart. Tulips, Anemones, Jonquils, from 6 to 7 inches apart. Hyacinths, Daffodils and Narcissus about 7 to 9 inches apart.

Always plant bulbs in a well drained location. They will do well in most any soil. A dressing of pulverized sheep manure or Bone Meal will help to produce long stems and beautiful flowers.

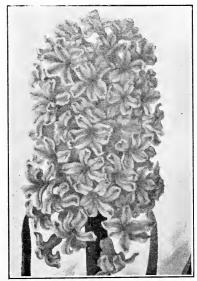

flowers

#### **HYACINTHS**

#### Prize Winning Imported Dutch Hyacinths

(Plant from October to January)

Hyacinths are very easy to grow, and can be grown in many different ways, out of doors. in pots, or fancy jardinieres with Bulb Fibre, or in Hyacinth Glasses with water. For outdoor growing care should be taken that ground is well forked over with a good supply of Manure. Set the Bulbs from four to five inches deep and seven or eight inches apart. Most planters

GIANT HYACINTHS

make a mistake of planting nearly all Bulbs too shallow, causing the top growth to sprout too quickly, which produces short stemmed Flowers. In planting Bulbs, especially in loose soil or sand, give them extra depth to produce roots so that they will take food value from the soil.

For pot growing, use sandy loam and bury the pots in the garden for five or six weeks or keep in a dark place to produce roots; then bring them into house to force into blooming. To grow in jardinieres, without drainage, use our Bulb Fibre as listed on Page Special Hyacinth Glasses can be purchased from us.

#### PRIZE WINNING GIANT HYACINTHS

The Hyacinths we oner are the obtainable and will all produce beautiful full blooms that which pride of your garden.
Cardinal Wiseman—Large Dark Rose.

One each of the above sixteen varieties, Postpaid.....

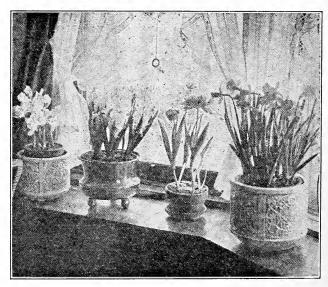

Hyacinth Glasses in all colors, 50c each. 10c each extra by mail at purchaser's risk.

#### Specially Prepared Bulb Fibre for Pot Culture (Indoors)

that does not sour, even the is ideal for the growth required. All that is Composed of a porous material that does not sour, even though thoroughly moist, and which is ideal for the growth of certain bulbs in pots. No drainage is required. All that is necessary is a medium depth or shallow bowl or jardiniere filled with moistened fibre. If too wet, squeeze by pressure of hand and tip the bowl to drain out surplus water. We recommend the following bulbs for growing in pots: Hyacinths, Paper White Narcissus, Chinese Sacred Lilies, Crocus, Tulips, Easter Lilies, Muscari, Lilies of the Valley, Scillas and Freesias.

15c per lb.; 5 lbs. for 60c; 25 lbs. for \$2.50. Postpaid.

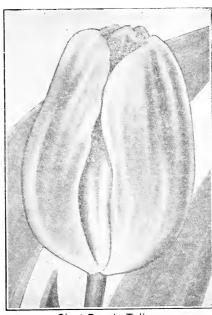

Fibre comes slightly moistened.

Many bulbs can be grown successfully indoors in pots

#### Fancy Imported Giant Darwin Tulips

(Plant from October to January)

Giant Darwin Tulip

This is the favorite type of Tulip. They excel in brilliancy of colors, perfect form of flowers, and long stout stems. For a beautiful effect in borders and planted in groups among shrubs, they are unsurpassed. As a cut flower, they are of great value, good keepers, and come in lovely shades of mauve, violet, maroon, pink and red. Our complete list of well balanced varieties will help our customer to choose a collection of these bulbs, which we know will give satisfaction.

Tulips are a very satisfactory flower, both for garden and pot culture. They require very little attention, and will grow in any fairly good soil. The soil should be forked deeply, then a coating of Bone Meal or any other good ferattlizer applied. Plant bulbs four or five inches deep, eight to nine in ches

apart. These planting directions apply to all the different types.

#### Sunset Tulip Assortment

Five each of five separate colors, Giant Darwin Tulips. Scarlet, dark red, pink, lavender and yellow, each in a separate package. The 25 bulbs, postage paid, for......

#### DAFFODILS and NARCISSUS

(Plant Oct. to Jan.)

EMPEROR DAFFODIL

Culture: Daffodils and Narcissi appear to greater advantage if planted in partial shade. This will proshade. This will pro-long their bloom, and will help to retain the color of the red and orange cup varieties. Set bulbs from four to five inches deep and eight inches apart. It eight inches apart. It is a good plan with all bulbs planted out of doors to cover ground on top with four or five inches of light material, such as straw or leaves, removing same after six or seven weeks. This will give weeks. This will give good root, the results will be extra large flowers. Do not cut the leaves after blooming let them die back; if cut back, severely, you will have no flowers the following season.

#### Fancy Daffodils and Jonquils

(All Postpaid) large trumpet. Emperor—Pure Yellow, large trumpet. Doz., \$1.50; 100, \$12.00. Empress—Large yellow trumpet with white perianth. Doz., \$1.50; 100, \$10.00.

#### **IXIAS**

(October to January)

They are much admired for their brilliant colors and graceful flower stalks, which resemble a miniature gladiolus. They come in several shades and are fine for cutting, lasting several days in water. The bulbs should be planted 1 inch deep and from 4 to 6 inches apart, and for best effect should be in beds or groups of 25 to 100 or more bulbs.

Splendid Mixture containing a great many varieties and colors, doz., 50c; 100, \$3.50. Postpaid.

#### Our Giant Flowering Gladiolus

#### Special Collection Giant Flowering Gladiolus

One each of the 25 varieties listed below, postpaid for .....

Our Gladiolus Bulbs are of the highest quality selected to produce the finest long stemmed blossoms of mammoth size. The varieties offered are the best in their particular color. Gladiolus are becoming more popular each year as they are such wonderful cut flowers, keeping in water when cut as long as ten to fourteen days.

Culture:-The bulbs should be planted about 4 inches deep and 7 or 8 inches apart. Any good garden soil will make strong plants and good bloom, but a light application of pulverized sheep manure or good commercial fertilizer applied on the top of the ground after the plants are several inches high will aid in producing larger blooms. Keep the ground moist until the flower spikes begin to appear, then water freely. The bulbs should be taken up in the fall, after the leaves have become yellow, and then stored in a cool, dark place, free from frost. From December to May are the months to plant Gladioli.

(All prices postpaid)

(September to January)

Giant-Pure White. Doz., 50c; 100, \$3.50. Postpaid. Giant-Red-Doz., \$1.00; 100, \$7.00. Postpaid.

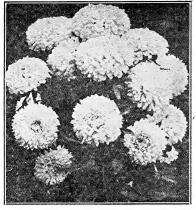

We carry many more varieties of bulbs and roots not listed in this catalog. If there is anything you wish, get in touch with us. We ship seeds, plants and bulbs to all parts of the world.

#### How To Raise Flowers Successfully From Seed

Cultural Directions—It is better in most instances except hardy annuals to start the seed in shallow boxes about 4 inches deep, using very sandy soil with leaf mould so that it will not bake, and provide for drainage by boring some holes in the bottom of the box. Set the boxes in a warm sheltered place, but protect from direct sunlight, as the seed is liable to be scorched up. When the plants have made the fourth leaf they should be pricked out, reset in another box or preferably in paper pots and when well started they should be transplanted into the garden. If the seed is to be sown directly in the garden, it should be done after the soil is well worked and fertilized. A slight depression should be made with a stick, the seed sown, and then covered with sharp sand about twice the depth of the diameter of the seed. The sand will prevent the crusting over of the soil after watering.

watering.

When up, the plants must be thinned from 2 to 12 inches, depending on the variety, otherwise they will be weak and spindling. Always keep the weeds out.

A common mistake in sowing flowers, as well as other seeds, is covering too deep. As a general rule, cover only the depth of the thickness of the seeds; or, with medium-sized or, With heading and seeds, like Balsams, Zinnias, etc., half an inch or less is the proper depth. Such fine seeds as Portulacas, Nicotiana, etc., need seeds as Portulacas, Nicotiana, etc., need only to be pressed into the soil with a piece of board or the palm of the hand. Always press the earth down firmly after sowing all flower seeds, else there is a danger of their drying up before the roots can get firm hold of the soil. get firm hold of the soil. Seeds of the hardier Seeds of the hardier annuals may be sown where they are to

grow; but as a rule, it is preferable to transplant, as the plants are generally stronger and stand the drought better. During very dry weather, and when the seedlings are first set out, they should be watered frequently. Provide some support for such annuals as require it.

annuals as require it.

The weeds should be kept down and the ground loosened often, so that the plants will receive the full benefit of the rains and dews, which they will not if the ground is allowed to become hard and baked. Water often.

It is very important to procure the best grade and quality of seed. One trial will prove to you we have the finest quality available. available.

### FRESH FLOWER SEEDS OF HIGHEST QUALITY

The following flower seeds are the finest improved strains from the most celebrated sources both in Europe and America.

#### Our Giant Orchid Flowering Spencer Sweet Peas

#### How to Grow Sweet Peas Successfully

In California we have two seasons for planting this popular annual. For the earliest Spring blossoms Fall planting from September to December is employed. For a succession of flowers, planting can be continued until late Summer. We know of no other flower which responds to good care so well and which rewards the growers with quantities of beautiful cut flowers.

o other flower which responds to good care so well and which bewards the growers with quantities of beautiful cut flowers.

Prepare your soil with a liberal dressing of our specially pulverized Sheep Manure or Bonemeal. Sweet

Giant Orchid Sweet Peas

verized Sheep Manure or Bonemeal. Sweet Peas are heavy feeders, due to the continued cutting of their blooms. Cutting and keeping of the withered blossoms greatly prolongs the flowering season. The soil should be deeply dug and thoroughly mixed with the fertilizer. Make a trench about 5 to 6 inches deep, planting the seeds 3 to 4 inches apart and covering them 1 inch deep with good soil. Sweet Peas do best in a well-firmed soil, so after planting tread the soil tight over the seeds with your shoes or any suitable implement. Thoroughly and completely soak the entire bed, and remember to keep moist, as any dryness after seeds germinate is fatal.

When the plants are 6 inches high, pinch out an inch or so of the top to make husky, sturdy plants, and gradually fill in the trench. By these

methods you insure deep-rooted, drought-resistant plants that will bear magnificent large, long stem flowers. This is also the time to provide a trellis. Five-foot common chicken wire neatly stretched is ideal. However, strings or small boughs can be used.

Any customer who wants a real fine Sweet Pea garden should not hesitate to order our Special Sweet Pea Bargain. We sold thousands of these collections last year and received many testimonials from all parts of the country, praising the quality of the blooms, the length of stem and the wonderful range of color.

#### **OUR SPECIAL SWEET PEA BARGAIN**

Exhibition collection of Giant Spencer Sweet Peas in a wonderful collection of eight gorgeous colors, each in a separate packet.

King Edward—Bright Red King White—Giant White Asta Ohn—Lavender Wedgewood—Azure Blue

#### When to Sow Flower Seeds in This District

This list enables one to tell at a glance when the various flower seeds may be sown. As some perennials will bloom the same season if sown early in the year, we therefore have stated the latest time in the spring they may be sown to bloom the same season; in regard to perennials that will not bloom the same year if planted in spring, we have stated the time they should be sown in the fall to bloom the coming summer. Also the time they may be sown in spring to bloom early the following year. Several varieties of hardy annuals if sown in the fall will come into bloom earlier than if sown in the spring, even if the plants do not make much progress during the cold weather. Tender and half hardy annuals, if sown early, should be started in a warm sheltered position and transplanted when the cold weather is over.

Tender and half hardy annuals, if sown early, should be starte in a warm sheltered position and transplanted when the col weather is over.

#### Highest Quality Lawn Seeds We Specialize in High Grade Lawn Seed

Our lawn seeds are the finest and highest grade obtainable. Practically all the good lawns in the West of Twin Peaks district are seeded with our seeds. We supply large quantities of our seed to the Government fortifications in and around San Francisco, as well as the Navy Department.

#### How To Produce a Good Lawn

Lawns can be made in California any month of the year, but if made from September to May will require less care and water. The ground should be well prepared. The soil should not be too rich, as at the start a rapid growth is not wanted from Grass sowed for lawns.

After the ground is thoroughly worked, roll the soil before seeding to prevent the soil from settling uneven. After the soil is rolled, then rake the surface lightly. Sow the seed so as to cover the ground thoroughly with seed. After seeding cover is rolled, then rake the surface lightly. Sow the seed so as to cover the ground thoroughly with seed. After seeding cover seed lightly with soil. Then roll again so as to press the seed in firmly. If you have no roller use boards and tramp on them so as to pack the ground firmly. A roller is preferred. If you do not pack the ground firmly the seed will grow in spots, and the mower will ruin the lawn on account of the soil being loose.

Grass Seed will germinate in from 8 to 15 days, according to the weather. If a lawn is made during the summer, after the seed has been rolled, the ground should be covered lightly with straw or grass so as to retain the moisture. New lawns should not be allowed to dry out, not even for half a day. For the first 15 days the lawn should be watered twice a day if it is required.

A lawn should be fertilized after the first cutting.

We recommend Pulverized Sheep manure (See page 39).

If these directions are carried out, the seed will quickly produce a firm, deep, velvety and elastic turf, with no tendency to stool or grow in clumps. It roots deeply and holds its beautiful emerald green color throughout the season. To keep this beautiful color, lawns should be fertilized with Lawn dressing twice a year. If stable manure, which is often full of weed seeds, is used, it will cost more to remove the weeds than to put in a new lawn lawn..

Sow the seed thick enough at the start and save yourself a lot of unnecessary work. Sow one pound to a space 10x10 ft.

#### Highest Quality Lawn Seeds

(All prices on lawn seed are postpaid within the 4th zone.)

Australian Rye Grass—A very vigorous quick-growing lawn grass, but a little coarse. Very satisfactory for lawns in San Francisco. Best grass for sandy soils. 1 lb., 30c; 10 lbs., \$2.50.

Pacific Rye Grass (Genuine Pacey's Rye Grass)—This grass is similar to the Australian Rye Grass, but has a finer leaf and is longer lived. Per lb., 35c; 10 lbs., \$3.00.

Chewing Fescue—Forms a close, lasting turf, succeeding well even under poor conditions. It is used extensively in lawn and putting green mixtures. Per lb., 60c.

Creeping Bent—Being of fine texture this grass is excellent for lawns and putting greens; makes a low velvety growth. Per lb., \$2.00.

Kentucky Blue Grass—Fancy; extra clean. The most popular grass for lawns. It is a dark green and of dense growing habit, making a beautiful turf in a heavy or black soil. Per lb., 65c; 10 lbs. \$6.00.

Red Top Grass—Gives a quick effect and succeeds on all soils, though doing best on moist soils. Should be in all lawn mixtures, Per Ib., 50c 10 lbs. \$4.50.

White Clover—Of dwarf habit with creeping stems, rooting at joints, on which account it makes an excellent turf that stands constant tramping. Planted for a lawn either alone or in mixture with grass seed. Per lb., 75c; 10 lbs., \$6.50.

Park Lawn Mixture (Formerly known as Golden Gate)—This mixture of hardy grasses contains a little white clover and forms a thick, strong turf that will stand hard usage. Lb., 45c: 10 lbs., \$4.00.

Shady Nook Mixture—This mixture contains grasses for making good lawns in shady places and under trees. Lb., \$1.00.

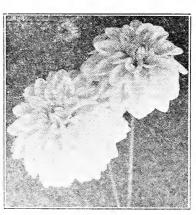

Sunset Special Lawn Mixture—This mixture will produce the finest lawn in almost any location. It is composed of four grasses and white clover and the result of many years experience. It will stay green all year round. One pound will sow a space 10x10 feet. 60c lb.; 10 lbs., \$5.50, postpaid.

#### Our Prize-Winning Dahlias

(All Postpaid)

#### Cultural Directions

Although Dahlias are easily grown in any good garden soil they respond readily to good cultivation. Prepare the soil by

digging 12 to 18 inches deep and working in a moderate amount of well rotted manure or commercial fertilizer. Plant the bulbs 21/2 to 3 feet apart at a depth of 5 or 6 inches. Give them just enough water when above ground to keep them growing slowly. Apply fertilizers and water in quantities only after the plant commences to bud. Dahlias may be planted from March to July, preferably in May.

Ambassador-Cac. Soft yellow buff shaded pink. \$1.00 each-

Amun Ra—Beautiful coppery orange, longstems, a prize winner decorative. 50c each.

Ballet Girl-Cac. Orange, splashed and tipped with white. \$1.00 each.

Black Jack—Decorative—Rich dark maroon. almost black. 75c. Chris's Lavender—Peo. A clear lavender of orchid shadings. \$1.00.

#### PRIZE WINNING DAHLIAS—(Continued)

Champagne-Beautiful golden champagne. 75c each.

Crown Princess Louise-Dec. Combination of old gold and deep amber. \$1.50 each

Danlia Imperialis (Tree Dahlia)—Ready in April. \$1.00 each.

Delice-Beautiful glowing rose-pink, fine cut flower. 35c each.

Earle Williams-Scarlet, tipped with white. \$1.00 each.

Ellinor Vanderveer-Dec. Lovely shade of rose pink. 75c each.

Faith Garibaldi-Gigantic rose pink. \$1.00 each.

Gertrude Ederle-H. C. Primrose yellow, erect stems. \$2.50 each. Golden Jubilee-Dec. A beautiful shade of golden orange. 75c each.

Halvella-Dec. A beautiful shade of rose-pink. \$1.00 each.

Kitty Dunlap-Dec. American beauty rose color. \$1.00 eacn.

Lenore Woolams-H. C. A beautiful shade of deep american beauty rose. \$1.50 each.

Miss California-Dec. Oriental fuchsia. \$1.00 each.

Pride of San Francisco—Dec. A brilliant salmon pink suffused with rose. 75c each.

Queen of the Garden-Dec. Color is light yellow with extra strong stems. \$1.00 each.

Regent-Cac. A lovely shade of lavender. \$1.00 each.

Rollo Boy—Delicate amber and old gold. \$1.50 each. Rosa Nell—Immense bright rose pink. 50c each.

Shudow's Lavender-Dec. The best lavender decorative to date. \$1.50 each.

Tommy Atkins-Dec. A very attractive shade of bright scarlet. 75c each.

White Wings—Dec. stems. \$1.00 each. A new clear white decorative with strong 'ellow Giant-Dec. Extra large flowers of golden yellow. \$1.00

each. We carry many other varieties not listed. If in the market write for prices.

All Dahlia roots postpaid.

#### Special Offer of Giant Flowering Dahlias

Assorted Giant Dahlias our selection, all properly labeled. Postpaid for only

#### Pompom Dahlias

This class produces small double flowers in great profusion. Splendid for cutting, owing to their keeping qualities. They grow about  $2\frac{1}{2}$  feet high, and very bushy.

Phyllis-Yellow, edged red. 50c each.

Sammy—Rich amber-yellow. 50c each. Little David—Bright Orange. 35c each.

Tommy Keith-Red, tipped white. 35c each.

#### Special Offer of Pom Pom Dahlias

One each of twelve different colors. Postpaid. All properly labeled, for only.....

#### NURSERY DEPARTMENT

We offer only the highest quality nursery stock obtainable. It is clean and healthy and established in our nursery under the most exacting conditions for best results. Our stock always gives satisfaction.

Customers will please remember that when our busy season commences we are rushed with orders and it may be a few days before their orders re-

Los Angeles

ceive attention; but they may rest assured that there will be no unnecessary delay in shipping.

GUARANTEE—We will warrant all trees and plants to be good and thrifty, but having no control over them after delivery to the transportation companies or over the planting and care after they are received by the buyer, we will not be responsible in any other direction than as stated. We exercise great care to have all our nursery stock true to name. Nevertheless it is understood that should GUARANTEE-We will name. Nevertheless it is understood that should any stock prove otherwise, we shall not be liable for any sum greater than that paid us for only such stock as shall prove untrue.

All nursery stock shipped at purchaser's expense except where marked postpaid. We deliver all nursery stock free in San Francisco.
free within the fourth

Items marked postpaid are delivered free zone.

#### HIGHEST QUALITY HARDY EVERBLOOMING ROSES

(Plant Nov., Dec., Jan., Feb., March, April)

We are Rose Specialists and are the largest dealers of Budded Rose Bushes in San Francisco. Our roses are known for their high quality and trueness of type.

Note—Our roses are used by the U.S. Government. We supplied hundreds of bushes to the Letterman General Hospital at the Presidio, Fort Mason, Navy Yard, Mare Island and other posts. We have the quality required by rigid government inspection. You will make no mistake in trusting us with your orders. Satisfaction guaranteed.

#### ROSE CULTURE

The rose loves a deep rich heavy soil, even inclined to adobe. In such soils the growth is strong and vigorous and the flowers have great substance. But even in a light, sandy soil, roses can be made to grow well, and they flower, as a rule, earlier than in heavy soil. To improve light soils, add clay, Holland peat, or adobe, and use pulverized Sheep manure as a fertilizer. Do not apply strong fertilizers directly to the roots, but dust it on the surface and rake in slightly after the bushes are planted.

planted.

planted.

By our careful system of canning and potting, roses can be planted at any time of year; but the safest time to plant bare root bushes is from November to April. Both heads and roots of bare-root plants must be cut back before planting and thoroughly soaked with water afterwards. Should the roots appear to be dry on arrival, mix up some soil and water and "puddle" the roots in it for a couple of hours before planting. This closes the pores of the roots temporarily and to some extent prevents loss of sap through evaporation, a most important

#### ROSE CULTURE—(Continued)

point. In planting, thoroughly soak the soil down before adding the last or surface soil. This insures every portion of the root being thoroughly covered and prevents cracking of the surface sowing to the top soil being loosely placed. Frequent hoeing or cultivating of the surface soil is absolutely necessary to keep this loose soil or 'mulch' on the surface. Especially is it necessary after watering. Plant the bushes so that the point where it is budded shall be at least three or four inches below the ground. Customers selecting their own roses are respectfully requested to add to the orders a few supplementary varieties, lest, by previous orders, the stock of any particular variety should be exhausted.

Abbreviations: T. means Tea Roses; H. T. means Hybrid Tea; H. P., Hybrid Perpetuals; Pol. Polyantha (Baby Roses); Per. means Pernetiana; N. means Noisette.

#### PRUNING

This should be done during the months of December, January and February. At that time the bushes are in a dormant condition. Cut just above a prominent but dormant bud that is pointing outward. It is difficult to give full data as to the method of pruning, but it might be summed up as follows:

Remove all small twiggy growths, pruning back to strong, well ripened canes which are well furnished with healthy, big dormant eyes. As a general thing, the entire top of the plant should be removed.

#### Hardy Everblooming Bush Roses

#### All Our Roses Are Strong Two-Year-old Bushes That Will Bloom This Spring

We pay snipping charges on Bush and Climbing Roses within the fourth zone by parcel post or express at our option. When ordering a general assortment of nursery stock, unless all items are marked prepaid, it is understood that shipping charges are to be paid by the customer.

#### Finest Roses of Recent Introduction

When priced at 35c each they are \$3.50 per dozen; 40c each they are \$4.00 per dozen; 50c each they are \$5.00 per dozen; 60c each they are \$5.00 per dozen. Six at the dozen rate. Special prices in larger quantities.

Angele Pernet (H. T.)—Deep flaming orange changing to brilliant

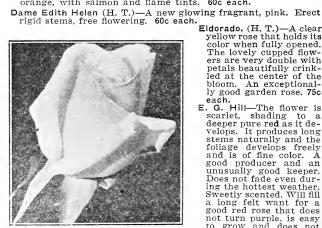

Angele Pernet (H. T.)—Deep flaming orange changing to tango. 75c each.

Betty Uprichard (H. T.)—The inner face of petals is a delicate salmon-pink to carmine, while the outer petals are a glowing carmine with a suffusion of orange; a glorious combination of colors. Awarded gold medal. 50c each.

Briarcliff (H. T.)—An improved Columbia. High-centered buds of exquisite form; color a bright clear shade of rose-pink; stems long, stiff and nearly thornless. Fragrant. 75c each.

Cuba (H. T.)—Although the flowers are almost single they possess a charm and brilliancy which is an entirely new tone in Roses, a bright vermillion-scarlet overlying an orange ground. A vigorous grower and good bloomer. 75c each.

Diadem (H. T.)—A large, fragrant double flower of copperyorange, with salmon and flame tints. 60c each.

The lovely cupped flowers are very double with petals beautifully crink-led at the center of the bloom. An exceptionally good garden rose. 75c each. G. Hill-

E. G. -The flower is scarlet, shading to deeper pure red as it de-velops. It produces long stems naturally and the foliage develops freely and is of fine color. A good producer and an unusually good keeper. good producer and an unusually good keeper. Does not fade even during the hottest weather. Sweetly scented. Will fill a long felt want for a good red rose that does not turn purple. is easy to grow and does not mildew. \$1.00 each.

#### Finest Roses of Recent Introduction (Continued)

Lady Margaret Stewart (H. T.)—The flowers in the young stage are deep sunflower-yellow heavily veined and splashed with orange-scarlet. The fully developed flowers are cadmiumorange. Buds long and pointed opening to very full flowers. Vigorous grower and free from mildew. 75c each.

Lulu—The best of its kind. The color is a deep rich apricot. Buds

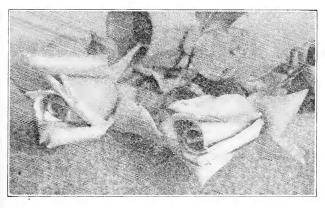

are long and pointed, similar to Irish Fireflame in form but with

twice as many petals. 75c each.

Matchless—The deep, cerise sport of Premier. We predict that this Rose will take the place of Premier, as the flowers are larger and the color much superior to the original Premier, 75c each.

Mrs. F. R. Pierson (H. T.)—A very much improved Premier, Color a dark cardinal red; very vigorous, sweetly scented; long stems, foliage large; dark and abundant. 75c each.

Mary Pickford (H. T.)—An exquisite shade of orange-yellow stained on the reverse of the outer petals with salmon. The buds are long and pointed and expand to medium size blooms. Free and constant bloomer. 60c each. orange-yellow

Padre (H. T.)—A most novel and attractive coloring, with fine long petals of coppery scarlet flushed with yellow at the base; an exceedingly free flowering sort of strong upright growth. 50c each.

President Cherioux (H. T.)—Very large, salmon-pink blooms with reddish buff shadings and petals of waxy texture. Splendid grower and liberal bloomer. 75c each.

President Herbert Hoover—(New) see page 40.

grower and liberal bloomer. 75c each.

President Herbert Hoover—(New) see page 40.

Queen Alexandra—A beautiful rose and very rare. Outside of petals old gold, inside bright vermillion. 60c each.

Rapture (H. T.)—An improved sport of Mad Butterfly with beautiful mildew proof foliage. Free grower. Deep salmon with bright golden suffusion. Pointed bud. Ask to see this rose at your florists. 60c each.

Rev. F. Page Roberts—New Rich Orange Gold, long buds, very beautiful. 75c each.

Sensation. As the name implies it is a "Sensation," due to the color and habit of growth. Anyone that has seen Premier can imagine what this is like, being better in every way, color, foliage and growth. Buds long and pointed opening full and double and retaining its color in the open flower. Blooms produced on long stiff stems well above the foliage and in great profusion. Color an entrancing shade of red. 75c each.

Souvenir de Claudius Pernet—A new, clear yellow rose which has made a tremendous sensation because of its practically unfading color and excellent habit of growth. The outer petals sometimes bleach a trifle, but the flower is sunflower yellow until it drops. Bloom is of large size and perfectly formed; foliage is extraordinarily dark, glossy, and fairly resistant to disease. Growth vigorous. 60c each.

Souvenir de Georges Pernet (H. T.)—Brick-red buds, opening to terra-cotta-pink blooms of immense size, very double and fragrant. Stocky, dwarf plant of free blooming habit. Like all Pernets it should be pruned lightly. 60c each.

Shot Silk (H. T.)—Its brilliant color is hard to describe; sort of an orange-cerise suffused with gold. Buds and flowers of medium size, very fragrant and produced freely. 50c each.

Sunstar (H. T.)—An attractive novelty of variable coloring, usually lemon-yellow, every petal edged, veined and splashed with rose and vermillon. Buds are long and elegant. 60c each.

Talisman (H. T.)—This new rose is a winner wherever exhibited. Long pointed bud, high centered, lasting well when cut. Very fragrant. Gol

## HIGHEST QUALITY HARDY EVERBLOOMING ROSES

#### Choice Assortment

American Beauty (H. P.)—Color rosy crimson; extra large full flowers; exceedingly sweet; makes magnificent buds. 40c each.

Austrian Copper—Bright copper color, single. 50c each.

Black Prince (H. P.)—Intensely dark crimson approaching black.
Flowers are cup-

shaped, large and full

Caroline Testout (H. T.)—Clear pink; one of the best Hybrid Tea roses up to date. It is clear pink and there is nothing in the rose line that can approach it in color. 50c each.

Cecile Brunner (Poly.)
—Popular baby rose.
Salmon - pink with
deep salmon center;
borne in clusters;
very small; full and
delicately scented.
50c each.

Cheerful (H. T.)—Flaming orange, a new and pleasing shade. Flowers very large and beautifully formed. 50c each.

Constance (H. T.)—Lovely, long orange-yellow buds, sometimes streaked crimson. Flowers golden yellow, full and globular, free flowering. 50c each.

Columbia (H. T.)—This beautiful rose is of strong, vigorous habit of growth and exceptionally free flowering. The flowers, which are of good size, are perfect in form. In color it is a most pleasing shade of rose-pink, and delightfully fragrant. 50c each.

Daily Mail Rose-See Mad Ed. Herriot.

Dorothy Page Roberts (H. T.)—Beautiful buds opening into large globular blooms of coppery pink, suffused with apricot—an unique rose possessing remarkably beautiful color shades. A strong grower and a free bloomer, an excellent bedding variety, to be recommended for the garden. Hardy. 50c each.

Duchess of Wellington (H. T.)—Saffron yellow tinted crimson, becoming deep coppery yellow; long pointed buds. 50c each.

Frau Karl Druschki or Snow Queen (H. P.)—A remarkably vigorous grower. Its flowers are very large, perfect in form, of the purest snow-white color, with large shell-shaped petals. A very free bloomer. 50c each.

Gen. Jacqueminot (H. P.)—Bright shining crimson, very rich and velvety, exceedingly brillant and handsome; makes magnificent buds. 50c each.

General McArthur (H. T.)—This is probably the greatest favorite of all the garden roses. The flowers are a vivid crimson scarlet and retain their brilliancy when the flowers are fully expanded. Very highly perfumed and practically free from damage by mildew. 50c each.

Golden Ophelia (H. T.)—The flower is of medium size, golden yellow in the center, paling slightly toward the outer petals; of perfect form. 60c each.

Golden Emblem (H. T.)—It is so perpetual flowering that as a garden and bedding rose it is without a rival. At its best it surpasses Marchel Neil in shape and formation, and with its wonderful coloring is a most beautiful rose. The coloring is a yellow cadmium toning to sunflower yellow. Altogether the most remarkable variety among modern roses. Gold Medal N.R.S., also A.N.R.S. at Philadelphia. 50c each.

#### Hardy Everblooming Bush Roses (Continued)

- Gorgeous (H. T.)—Flowers large and full and exquisitely formed of an amber-yellow, veined with reddish copper, a novel and striking color; of strong, vigorous habit. 50c each.
- Hadley (H. T.)—Excellent, dark velvety crimson variety with long stems, carrying flowers well above the foliage. Very fragrant. 50c each.
- Hoosier Beauty (H. T.)—One of the grandest red roses, of an extremely rich velvety crimson color which does not shade into maroon. A heavy bloomer of strong, upright growth. 50c each.
- Huge Dickson (H. P.)—A vigorous grower, with handsome foliage, sending up strong vigorous canes surmounted with blooms of a brilliant crimson shaded scarlet. 50c each.
- Independence Day (H. T.)—Flame tints overlying a bright apricot color, blooms carried on erect stems, exceedingly free flowering with mildew-proof foliage. 50c each.
- Irish Elegance—A single rose, beautiful in bud; color, apricot shading to bronze at base of petals. 50c each.
- Irish Fireflame—A beautiful single rose, bearing its flowers in clusters of five or more; buds are a rich, deep orange flushed with crimson, opening to a large single flower of an old gold color. Awarded gold medal. 50c each.
- Isobel—A fine new single rose, carmine-red, flushed orangescarlet, large petals, very free flowering. 50c each.
- Jean C. N. Forestier—Vigorous, bronze foliage, large blossoms carmine red and yellow, hardy and mildew proof. 50c.
- Juliet (H. P.)—A distinct variety with large, perfect flowers. The outside of the petals is gold and the interior rich rosy red, changing to deep rose; very fragrant. 40c each.
- J. L. Mock—Giant imperial pink, the outside of the petals silvery white. 50c each.
- Kalserin Augusta Victoria (H. T.)—This beautiful rose blooms continuously. It is pure white and its petals are large and of the very best substance. 50c each.
- K. of K.—Kitchener of Khartum—(H T.)—Flower of absolutely pure intense scarlet color, its huge petals are velvet sheened, solid scarlet throughout, semi-single. The blooms are produced in great profusion throughout the season, and are deliciously perfumed. A rose of marvelous beauty and distinctness, and one that will hold the highest place of admiration wherever it is grown. 50c each.
- Lady Hillingdon (T.)—A grand rose for garden decorations. Blooms continuously; buds very long, with a most pleasing shade of orange yellow. 50c each.
- Lady Pirrie (H. T.)—Deep coppery reddish salmon, inside of petals apricot-yellow, flushed fawn and copper. 50c each.
- La France (H. T.)—Silvery pink; one of the finest of roses; the color is a most lovely rose, with silvery luster it is a constant bloomer, and very sweet-scented. 40c each.
- Los Angeles (H. T.)—A very vigorous grower and continuous bloomer, producing long stemmed, fragrant flowers of a brilliant flame-pink shading to coral and gold at the base of the petals; buds long and pointed. 50c each.
- Louise Catherine Breslau (H. T.)—The buds are coral-red shaded with chrome-yellow, while the expanded flowers, which are very large, are shrimp-pink shaded coppery-orange and chrome yellow. 50c each.
- Mad. Butterfly (H. T.)—Long buds, beautifully shaped blossoms, bright pink suffused apricot and gold; a free bloomer and erect grower. A sport of Ophelia. 50c each.
- Mme. Edouard Herriot, the Daily Mail Rose (H. T.)—The buds which are long and pointed are coral-red, shaded yellow at base; the open flowers of medium size and semi-double are a beautiful coral-red, shaded with yellow and bright rosy scarlet. A vigorous grower. 50c each.
- Maman Cochet (T.)—Rosy pink. A vigorous grower, with beautiful foliage; the bud is long and pointed borne on long stiff stems. 40c each.

#### Hardy Everblooming Bush Roses (Continued)

OPHELIA

Miss Lolita Armour (H. T.)

—The color of this fine rose is absolutely distinct from all others. The flowers are large and full with petals of great substance and sweetly scented. As the flowers expand they develop to a deep coral red with a golden coppery red suffusion. A vigorous grower and free bloomer. 50c each.

Mrs. Aaron Ward (H. T.)

—Long buds borne on erect stems; flowers large; Indian yellow, suffused with salmon-rose, 50c each.

Mrs. Chas. Russel! — This is a strong, healthy grower, the blooms are large, full, having a beautiful shade of rosy pink. A splendid variety for garden planting. 50c each

Moss Roses—Old fashioned favorites, sweetly scented. Pink or Red. 50c each.

Mrs. Wm. C. Egan (H. T.)—A beautiful soft shade of light pink shading to flesh; buds are of perfect shape and last unusually long after cutting; vigorous grower. 60c each.

Mrs. S. K. Rindge—Rich chrome yellow, suffused soft pink. Long pointed buds. 50c each.

Ophelia (H. T.)—Since its introduction several years ago, it has been growing steadily in public favor. It is a heavy grower and produces flowers in abundance. In color it is salmon pink shaded, rose and yellow at the base of petals. A splendid variety for outdoor culture. 50c each.

Papa Gontier (T.)—A magnificent bold flower; finely formed buds; color brilliant carmine, changing to rose and lilac; delightfully fragrant, and is the most popular rose of its color. 50c each.

Paul Neyron (H. T.)—This rose produces the largest of all rose blooms. In color bright salmon pink, very clear, and double; highly scented. 40c each.

Premier Supreme (H. P.)—An improved Premier, resistent to disease. Very long bud, high centered blossom. Deep rose pink, long erect stems. Very fragrant. 50c each.

Radiance (H. T.)—Very free flowering habit and a strong grower. The flowers are a beautiful blending of shades of carmine rose with opal and carmine reflected, and is very fragrant. 50c each.

Red Radiance—The same as Radiance except it is a beautiful shade of red and very fragrant. 50c each.

Rose Marie (H. T.)—Beautiful long buds and well formed flowers of a clear rose-pink; very fragrant. 50c each.

Sunburst (H. T.)—Few roses have so many favorable points all combined in one plant. Its bronzy foliage, its long pointed, orange-yellow buds, becoming deeper towards the center, carried on long stiff stems place it in the front rank among the yellow roses. 50c each.

Ulrich Brunner (H. P.)—Brilliant cherry red. Flowers fine form and finish, carried well upon the plant. Petals of great substance. A very valuable rose. 40c each.

Willowmere—Large full blossoms; coral red, shaded shrimp pink. 50c each.

Wm. F. Dreer (H. T.)—On account of unusual color of the bud and bloom makes the rose one of the most attractive of the new varieties. The color is one so hard to accurately describe that one has to see it in order to conceive its beauty. Soft apricot pink deepening on outside to a salmon pink which produces a charming effect. Profuse bloomer and good grower. 50c each.

### Select List of Hardy Climbing Roses

60c, 70c each, postpaid.

Brown's Improved Whirlwind Sprayer -

For spraying liquid insecticides of all kinds on plants. Also good for spraying kerosene in chicken houses, etc. We consider this new model the best tin sprayer on the market at a low price. 50c each; 60c postpaid.

There are so many insects attacking plants, that regardless of how good the insecticide is, that is being used or recommended for this particular insect, the secret of the whole spraying is a good sprayer. Many people, who have a good sized garden, make the mistake of buying a cheap sprayer, that is not efficient in the application of any insecticide, and applying insecticides is one half of the battle. We recommend using compressed air sprayers for that reason. Patrons who are in doubt as to the use of insecticides, should write us, and we will be glad to advise you to the best of our knowledge. to the best of our knowledge. 37

# NOVELTIES AND SPECIALTIES of exceptional merit Wonderful New Rose "President Herbert Hoover"

A cross between Sensation and Souvenir de Claud. Pernet, Beautifully formed, large blossoms and very fragrant. The color is a charming combination of cerise pink, flame, scarlet, and yellow with broad thick petals retaining this characteristic for days after the flowers have fully opened. The foliage is clean and handsome. This rose is going to be a winner. \$1.50 each, postpaid.

#### NEW BEAUTY BUSH

Kolkwitzia Amabilis

An exceedingly handsome ornamental shrub from Central Asia. The foliage and habit are attractive when the bush is out of flower and it is perfectly hardy as far north as Montreal. It grows 6 to 9 ft. high when mature but can be kept down to any desired height by pruning. It is of erect growth and twiggy producing long arching branches covered with clusters of small, tubular flowers of the honeysuckle type, borne in such profusion that the bush is one cloud of delicate pink. This novelty should be in every garden. \$1.50 each, postpaid.

#### KOREAN SPIRAEA

New drooping type of this beautiful shrub. Branches covered with pure white blossoms. \$1.00 each, postpaid.

#### GOLDEN LEAFED MOCK ORANGE

This Mock Orange is very attractive having bright golden foliage. The blossoms are single pure white and very fragrant. Strong plants. \$1.25 each, postpaid.

#### **AZALEAS**

These beautiful flowering shrubs are a sight to behold in early spring. They are of dwarf habit and smothered with the brightest colored blossoms. The foliage is also beautiful being glossy and clean looking.

Azalia Japanese Evergreen—Crimson flowering. Extra strong, well branched bushes. \$2.50 each, by mail add 25c postage.

Azalia Indica—This variety is used extensively as a house plant, and comes in all colors. Extra strong, well branched bushes. \$3.00 each, by mail add 25c postage.

#### RHODODENDRONS

This well known gorgeous blossom attracts thousands of visitors to Golden Gate Park during the blooming season. Rhododendrons are not the tender plants that many people suppose. They do well most anywhere, if planted in a partially shaded location. Our plants are all grafted, well branched and bear flower buds. Do not confuse these with wild varieties which do not grow out of their native habitat. Ready for planting about Dec. and through winter until spring.

Pink Pearl—The finest of the pink-flowering varieties with immense trusses of bright pink blossoms. Balled, well branched bushes with flowering buds. \$5.00, \$6.00 and \$7.50 each.

Alice—Similar to Pink Pearl but a more compact bush with darker foliage. Prices same as Pink Pearl.

Hybrid Rhododendrons—Lavender, Rose, Red and White balled. \$3.50 each.

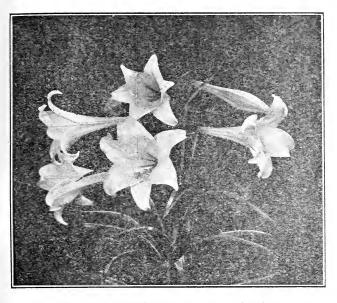

Gardenia—This pure white sweet scented blossom is the most popular corsage flower used by florists. Must be grown indoors or in sheltered spots outdoors. \$1.00, \$1.50 and \$2.50 each.

#### SPECIAL COLLECTION of ASSORTED FERNS

We have many beautiful varieties of hardy ferns which we can supply any time of the year. These ferns can be transplanted into larger pots and grown to be beautiful specimen plants. Also fine for fern dishes.

SPECIAL, 20c each, \$2.00 per doz. postpaid.

#### FLORAL DEPARTMENT

Potted Easter Lilies in bloom for Easter. Specimen plants, \$1.50, \$2.00, \$2.50 each.

In addition to our seed and nursery business we carry a complete line of cut flowers at reasonable prices and deliver them free anywhere in San Francisco. A skilled floral artist is always ready to make up artistic funeral pieces, baskets, wedding bouquets, etc., on short notice. We make a specialty of Holiday Plants at prices that will please you. We ship flowers all over the Pacific Coast.

Funeral sprays from \$1.50 up.
